

## Quick Draw Tool Apron GT2051

The Quick Draw Apron is the most advanced innovative tool apron ever introduced to the window tinting industry. It's crafted with durable, water-resistant materials and constructed with numerous beneficial features.

GT2051

### Product Overview

Use the Quick Draw apron for automotive and flatglass installs. The apron's features enhance speed and comfort with an elastic waist band that contours the body without the constriction that most other tool belts cause. In addition, the oversized pockets are ideal for holding squeegees and keeps them deep enough to reduce the risk of contact against the paint of a vehicle.

### Features

The Quick Draw Tool Apron features a separate slot for your knife and has a card holder positioned in the front middle pocket. Multiple slots can be used for personal customization and functionality to hold Olfa Packs, knives, markers, pens, etc.
