

Titan Squeegee GT1042 RED

The TITAN has been in pursuit of a plastic that can offer more strength and rigidity. TITAN is now being made from the same plastic used to make bullet proof glass.

We are shipping the **NEW TITAN NOW!!!**

Product Overview

The NEW TITAN is stronger and has less flexibility, this puts more blade on the glass and transfers more pressure to the blade tip.

The NEW TITAN will be acknowledged by changing the blade color from **blue** to **red**.

We want TITAN to be the best it can be and because of production and material costs there have been price increases, but we are sure you will like the performance of the NEW TITAN.

**THE OLD BLUE STYLE TITAN
IS NO LONGER AVAILABLE**

Please reference GT1042 RED on your price sheet. Please call if you have any questions.
