Tri-Edge Blue is a new tool in the industry with the latest technology that helps apply window film with ease. Its patented design high quality material makes this tool one of a kind. Its precision angles and comfort grip will allow the user to reach those challenging areas to achieve perfection. This tool has been analyzed and closely inspected to ensure that the finish is smooth, no more rough edges. This technology is estimated to greatly reduce the risk of potential scratches when applying the film.

Tri-Edge Yellow is our next level tool. We have turned up the strength on the already great design. For those installers that prefer a slightly harder material, Tri-Edge Yellow will be sure to meet your needs. Same as all of the Tri-Edge designs; our high quality carefully inspected material will ensure a smooth edge for proficient handling.

Tri-Edge Orange is our most rigid tool yet. Look no further for the perfect tool to finish the job. Offering both strength and support, the Tri-Edge Orange has strong edges that will finish off those hard to smooth creases. Same as all of the Tri-Edge designs, our high quality carefully inspected material will ensure quality performance.
