The Fusion Big Mouth Handle features brass inlaid screw threads and stainless steel screws. This handle is designed to hold a 3/8” thick squeegee. One of the biggest issues installers encounter when installing thick mil films is extended dry time. This is mainly due to not being able to extract a majority of the solution because their current tools flex too much or they don’t have enough strength to push as hard as they need to. The Big Mouth handles and 3/8” blades are the solution to that problem by taking more of the force required to adequately finish the job off of the installer and onto the tool. If you want to get optimum use of your Big Mouth Blade, use the Fusion Big Mouth Stretch Handle. The 14 1/2” extended handle is texturized with dual grips for maximized leverage.

GT974SOFT PROFESSIONAL METER SALES KIT W/CASE
Our UV & Solar Sales Presentation Kits offer a single source for convenient and convincing sales demonstrations. Kit includes: GT968 Digital BTU & Trans-Meter, GT962N Heat Lamp Unit, GT973 UV Meter, GT963 UV Light Source Lamp, GT971 Soft Case with Strap.

GT971 SOFT CASE
Position the meter facing the UV source, such as sunlight or a heat lamp (GT962N), and turn the meter on. Place various materials between the meter and the UV source and the resulting UV Transmission percentage will be displayed. Powered by a 9-volt alkaline battery (included).

GT973 UV SENTRY METER
Use this meter to evaluate solar performance. It provides excellent resolution, reading low light conditions more accurately than competitors, with no need for adjustments. The easy to read digital display toggles between power and transmission percentage mode. It’s small, portable, and convenient to take out in the field. Can be switched to read in metric units. Powered by a 9-volt alkaline battery (included).

GT967 SP1080 DIGITAL BTU SOLAR POWER METER
This wide spectrum digital meter measures solar radiant energy intensity directly transmitted through glass (or the film-glass combination) in units of BTUs per square foot per hour or watts per square foot. Effective tool showing the relative effectiveness of various films in blocking solar radiant heat. Especially useful for showing how a very dark dyed film may allow far more energy to pass through than a much lighter metallic film. Can be switched to read in metric units. Powered by a 9-volt alkaline battery (included).

GT968 SP2080 SOLAR TRANSMISSION & POWER METER
GT977 XM1400 SOLAR & UV TRANSMISSION METER
The XM1400 is able to calculate the Solar & UV Transmission percentages of glass, film, coatings, laminates or other materials.

GT960 LOW-E COATING DETECTOR
