GT1047BM 5" FUSION BIG MOUTH HANDLE

The Fusion Big Mouth Handle features brass inlaid screw threads and stainless steel screws. This handle is designed to hold a 3/8" thick squeegee. One of the biggest issues installers encounter when installing thick mil films is extended dry time. This is mainly due to not being able to extract a majority of the solution because their current tools flex too much or they don't have enough strength to push as hard as they need to. The Big Mouth handles and 3/8" blades are the solution to that problem by taking more of the force required to adequately finish the job off of the installer and onto the tool. If you want to get optimum use of your Big Mouth Blade, use the Fusion Big Mouth Stretch Handle. The 14 1/2" extended handle is texturized with dual grips for maximized leverage.
